

III.1 Active and Healthy Ageing - SmartCare project

Nowadays, European regions face several societal and economical challenges

More efficient health and social care systems are part of the solution

How?

**ICT based integrated care services:
a *smartcare* approach**

III.1 Active and Healthy Ageing - SmartCare project

Objective: define and pilot integrated care services for older European citizens, thus contributing to the development of more resource-efficient regional care systems

Expected output: Guidelines to deploy integrated e-care services in other European regions

- **41 partners**
- **22 European regions**
- **10 pilot regions (2 waves)**
- **12 observer regions grouped in the Committed Regions Board (CRB) chaired by AER**

III.1 Active and Healthy Ageing - SmartCare project

SmartCare Committed Regions Board (CRB)

A project's advisory board composed by regions that will not actually pilot the SmartCare services, but that will closely follow the service process design and implementation in order to pave the way for their implementation in the near future

Join the CRB!

You will have the chance to:

- **Learn more about ICT-based integrated care**
- **Learn from the experience of SmartCare pilot regions**
- **Prepare your region to deploy integrated e-care services**
